

ABC Ltd is a digital marketing company with clients from various industries. The company uses channels like meta ads, Google Ads, website, and email marketing to improve its clients' digital reach and help them reach relevant consumers. We have provided data on ABC Ltd's clients and the campaigns they have used for digital marketing.

The following is data for marketing campaigns.

[\(Link to the Excel file attached\)](#)

They are categorised based on the Channel used for the Campaign, Company, Conversion Rate, ROI, Clicks, Engagement, and Year.

Here is a detailed explanation of the fields shared in the sheet-

Conversion Rate:

- It represents the percentage of users who take a desired action (e.g., signing up and purchasing a product) after engaging with the campaign.
- A higher conversion rate indicates that the campaign effectively persuades visitors to complete the intended action.

ROI (Return on Investment):

- Measures the profitability of the campaign relative to its cost.
- A higher ROI means the campaign generates significant returns compared to its investment.

Clicks:

- Represents the number of times users have clicked on the campaign links (e.g., ads, social media posts).
- Higher clicks suggest strong user interest, but effectiveness depends on whether those clicks translate into conversions.

Engagement Score:

- Indicates the level of user interaction (e.g., likes, shares, comments, time spent on page).
- A high engagement score suggests that users find the campaign content valuable and are interacting with it.

Here are the detailed steps to follow to make the Excel Dashboard:

- Open the data given in Excel.
- The given data is clean data. So, data cleaning process is not required.
- Create a pivot table using the fields - years and average conversion rate. Then, create a bar chart for the same.
- Customise the visual to make it better according to your preference.
- Create a pivot table using fields years and sum of clicks.
- Now, create the horizontal bar chart.
- Customise the visual to make it better according to your preference.
- Create a pivot table using the field's years and the average ROI. Now, create an Area Chart for it.
- Customise the visual to make it better according to your preference.
- Create a pivot table using the fields years and sum of engagement. Then, create a Line Chart for the same.
- Customise the visual to make it better according to your preference.
- Create a slicer of the channel used and the company.

Drag all the charts and slicers to a Dashboard Sheet and customise the dashboard according to your preference

Based on the Dashboard you have created, analyse the details given below and

1. What are the overall click rate, engagement score, and ROI for NexGen System Company across different marketing channels in 2011 and 2012?
2. Which company has the most effective Digital marketing campaign among the companies given, and how can they optimise their channel for further campaigns?
3. Based on the different marketing channels, which channels have the highest engagement and ROI and why?

You are required to submit a zip file containing an Excel File of the Dashboard and a Word document or PDF containing your analysis of the outputs, or an Excel File of the Dashboard including your analysis of the outputs in Excel itself, or a Word document or PDF including the dashboard analysis screenshots and analysis of the outputs.

1. NexGen Systems — Overall Analysis for 2011 vs 2012

Based on the dashboard results we just generated, the main story is that NexGen Systems performed much better in 2011 than in 2012 in terms of overall clicks and engagement, while YouTube remained the strongest channel for ROI.

Important: The figures below are read from the dashboard charts, so some click/engagement/ROI values are approximate. Also, where the dashboard shows no bar for 2012, I treat that as no available data, not as zero performance.

Channel	2011 Clicks	2012 Clicks	2011 Engagement	2012 Engagement	2011 ROI	2012 ROI
Email	1812	No data	30	No data	4.61	No data
Facebook	1223	No data	16	No data	4.32	No data
Google Ads	3637	886	23	7	5.83	2.72
Instagram	3415	No data	39	No data	4.57	No data
Website	2441	359	28	8	5.40	3.77
YouTube	2,336	897	27	15	6.06	5.58

NexGen Systems showed stronger marketing performance in 2011 than in 2012. Google Ads generated the highest number of clicks in 2011, while Instagram produced the highest engagement. However, YouTube delivered the strongest and most consistent ROI, with approximately 6.0 in 2011 and 5.6 in 2012. In 2012, clicks and engagement declined significantly across the available channels, particularly for Google Ads and Website. Therefore, NexGen Systems should continue investing in YouTube because it maintained high ROI and relatively strong engagement, while reviewing the decline in Google Ads and Website performance.

“YouTube was the most consistent and efficient channel for NexGen Systems.”

Recommendation: NexGen Systems should prioritize YouTube because it delivered the strongest and most consistent ROI across 2011 and 2012. The company should also investigate the decline in Google Ads and Website performance in 2012. Instagram should be considered for engagement-focused campaigns, while future marketing budgets should be allocated based on both ROI and engagement rather than clicks alone.

2. Which company has the most effective digital marketing campaign?

Comparison of all companies:

Company	Avg. Conversion Rate	Avg. ROI	Total Clicks	Avg. Engagement
NexGen Systems	8.5%	5.28	37,342	6.03
TechCorp	8.0%	5.22	41,816	4.71
Alpha Innovations	7.4%	5.31	29,813	5.22
Innovate Industries	7.7%	4.94	42,804	5.34
DataTech Solutions	7.7%	4.89	39,647	5.97

I would select **NexGen Systems** as the most effective overall company.

The reason is that it provides the **best balance across the four measures**:

- **Highest average conversion rate: 8.5%**
- **Highest average engagement: 6.03**
- **Second-highest ROI: 5.28**, very close to Alpha's 5.31
- **Strong total clicks: 37,342**

Alpha Innovations has the highest average ROI, while Innovate Industries has the highest clicks. However, NexGen Systems performs consistently well across **conversion, engagement, ROI, and clicks**, rather than being strongest in only one metric.

3. Which channels have the highest engagement and ROI, and why?

Based on the complete campaign data, YouTube has the highest average engagement and the highest average ROI among all marketing channels.

Channel	Avg. Engagement Score	Avg. ROI
YouTube	5.62	5.41
Instagram	5.56	4.84
Facebook	5.52	5.21
Email	5.49	5.14
Website	5.45	5.06
Google Ads	5.07	5.10

1. Highest engagement — 5.62

YouTube has the highest average engagement score, indicating that campaigns on this channel generated strong interaction from users.

2. Highest ROI — 5.41

YouTube also has the highest average ROI. This means it generated the strongest returns relative to the marketing investment among the channels in the dataset.

3. Strong combination of engagement and profitability

The important point is not just that YouTube gets engagement. It achieves **both high engagement and high ROI at the same time**. This makes it a strong channel for future campaigns.

What about the other channels?

- **Instagram** has the second-highest engagement (**5.56**) and the highest total clicks (**38,074**), so it is useful for generating traffic and interaction.
- **Facebook** also performs strongly on engagement (**5.52**) and has the second-highest ROI (**5.21**).
- **Email** has the highest average conversion rate (**8.13%**), making it useful for turning interested users into conversions.
- **Google Ads** has the lowest engagement (**5.07**) but still maintains a reasonable ROI (**5.10**).

YouTube is the strongest marketing channel based on the overall data, with the highest average engagement score of **5.62** and the highest average ROI of **5.41**. This indicates that YouTube campaigns are successful at both engaging users and generating strong returns from marketing investments. Instagram and Facebook also show strong engagement, while Email has the highest average conversion rate. Therefore, **ABC Ltd** should prioritize YouTube for future campaigns while using Instagram and Facebook to increase engagement and Email to improve conversions.
